Help in the Effective Presentation.

Sanjeev Sharma

Full Stack Web Developer

Professional Summary

****Professional Summary:**** Dedicated Full Stack Web Developer proficient in MERN stack, with expertise in JavaScript, Node.js, and React.js. Strong problem-solving abilities and a proactive mindset, leveraging Generative AI to optimize workflows. Quick at learning new technologies to enhance development processes and drive software excellence.

Projects

Tomato.com [Live Demo Link](#) [Github Repo Link](#)
JavaScript React Git Node.js Express.js
MongoDB RESTful APIs HTML5 CSS3
Responsive Web Design

- Developed full-stack web application for online food delivery using MERN stack (MongoDB, Express.js, React.js, Node.js).
- Implemented features including user authentication, admin panel, and responsive UI for a seamless user experience.
- Created and optimized RESTful APIs to ensure efficient server-side performance.
- Designed and developed database models and wrote efficient queries for enhanced data handling.
- Conducted thorough testing and debugging to ensure application reliability and stability.

Shop.Com Clone [Live Demo Link](#) [Github Repo Link](#)
JavaScript Git RESTful APIs HTML5 CSS3
Responsive Web Design

- Developed an intermediate-level clone of Shop.com using JavaScript, RESTful APIs, HTML5, and CSS3.
- Implemented features such as homepage, login/signup, add to cart, and dummy payment to simulate a complete e-commerce experience.
- Utilized Git for version control and collaborative development workflow.
- Focused on responsive web design to ensure cross-device compatibility.
